

White Fillings

Composite tooth-coloured fillings are a great alternative to old-fashioned dark amalgam fillings, and can help give you a flawless new white smile.

We Care™ about giving you a smile that is functionally effective as well as being beautiful, which is why durable new composite fillings are an ideal alternative to amalgam fillings. Composite fillings are able to withstand immense biting and chewing pressure, are highly resistant to fractures and aesthetically pleasing.

Another advantage of composite fillings is that they need less of your natural tooth to be removed in preparation, for smaller fillings. And what's more, tooth-coloured fillings can often be placed in just a single appointment.

Teeth Whitening

We Care™ about giving you the great self-confidence boost that comes from naturally brighter, more attractive white teeth. At 1300SMILES we can provide either in-chair or take home whitening treatments.

ZOOM™ In-chair Whitening

ZOOM™ in-chair tooth whitening uses advanced technology to give you great results, all in the comfort of our modern practice. ZOOM™ uses a special whitening gel, applied to your teeth and activated by a blue light. It's effective, safe and very fast, lightening your teeth by up to eight shades in around an hour.

At-home Whitening Kits

For a convenient whitening treatment to use at times that suit you, our at-home whitening treatment uses custom-made trays and whitening gel that are worn overnight. Your treatment lasts for seven to ten days, but you'll start to notice whiter teeth after just a few days.

COSMETIC DENTISTRY

You are in great hands at 1300SMILES. As one of Australia's largest dental groups, we provide high standards of patient care, support and clinical excellence; delivered to you by your dedicated local team.

We Care™ about giving you the self-confidence boost that comes with a beautiful, straight new smile. Because your smile is one of the first things people notice about you, at 1300SMILES we are proud to provide cosmetic dentistry procedures that can give you the smile of your dreams.

By keeping up-to-date with the latest technology and treatment techniques, the 1300SMILES team provides the very best service and care to restore the health and beauty of your smile.

We encourage you to ask questions about any aspect of your procedure, before we begin. We want you to be completely informed and comfortable with your treatment, because your needs and concerns are at the heart of everything we do.

About Cosmetic Dentistry

Your smile is one of your most instantly noticeable features, which is why many people choose to enhance their smile with one of our cosmetic dentistry treatments.

At 1300SMILES you can choose from our range of cosmetic dental treatments designed to enhance your smile, such as porcelain veneers, crowns and bridges, or tooth-coloured fillings and teeth whitening. We Care™ about giving you the very best of care, using the latest treatment techniques and technology.

Crowns and Bridges

Dental crowns and bridges provide a great looking restoration for chipped, cracked or decayed teeth. With their natural tooth-like appearance, a crown gives great protection for a single tooth, while a bridge replaces one or more missing teeth.

Both treatment options are strong and durable, being custom made and fitted to ensure your long-term protection and improved appearance.

We Care™ about the success of your treatment, performing a thorough examination and careful preparation before placing your crown or bridge, which can often be completed in just two appointments at 1300SMILES.

Porcelain and Composite Veneers

Dental veneers are incredibly thin, completely natural-looking shells, bonded to your front teeth to close gaps, repair chips, straighten crooked teeth, or cover permanent stains. A fast and extremely aesthetic solution, veneers provide you with a great looking and long-lasting smile.

Dental veneers are custom made from either porcelain or composite in our dental laboratory, to create a bright, natural-looking smile featuring beautifully aligned, perfectly-shaped teeth.

The extreme thinness of dental veneers means they require little or no reshaping of your natural tooth to fit snugly. As well as their major aesthetic benefits, the strength and durability of veneers helps them protect the surface of a damaged tooth.

Inlays and Onlays

A natural looking alternative to fillings, inlays and onlays are custom-made from strong, durable porcelain to fit and fill most types of cavities, and when placed are almost impossible to distinguish from your natural teeth.

In contrast to conventional fillings, which require the removal of large amounts of healthy tooth, with inlays or onlays only the damaged portion of your tooth needs to be removed.
