ORTHODONTICS

\$99/Week Dental Packages for extensive dental work.

\$1000 to \$5000 dental vouchers are available, all at \$99/week.

1300SMILES Dental Vouchers are for complex dental care costs or for the cosmetic dentistry you have been promising yourself. You no longer have to wait or stress about where to find a larger lump sum.

Now there is a real alternative for managing the cost of major dental work. By utilising the \$99/week vouchers, you can make the most of the world-leading standards in dental care at your local 1300SMILES practice.

Orthodontics

At 1300SMILES, our goal is to help children and adults achieve an ideal bite and a straight, healthy and beautiful smile for life. The orthodontic treatments we use have little in common with the old fashioned, heavy and bulky metal wires and brackets you may be familiar with.

Your orthodontic treatment may consist of many different appliances, attached to your teeth in order to move them into their correct position. Headgear, expanders, braces or clear aligners are just some of the appliances we can prescribe, according to your individual needs. Your treatment usually lasts around one to three years, depending on your current situation.

Children, teens and adults can all benefit from orthodontic treatment, because healthy teeth can be moved at almost any age. Some orthodontic problems can be fixed more easily if they are detected early, which is why we recommend you attend regular examinations at 1300SMILES.

ORTHODONTICS

You are in great hands at 1300SMILES. As one of Australia's largest dental groups, we provide high standards of patient care, support and clinical excellence; delivered to you by your dedicated local team.

We Care™ about ensuring you have a straight, healthy smile for life. There are many reasons why straight teeth are important, including a more attractive smile, better facial structure, and improved chewing and jaw function. Irregular teeth can lead to tooth decay, gum disease and eventually tooth loss. That is why at 1300SMILES we are proud to provide orthodontics for both adults and children.

With orthodontics we can correctly align your teeth and jaws, using appliances such as braces. Realigning your bite can greatly improve your ongoing dental health, and in some cases, can bring the facial and jaw structure back into balance.

Your 1300SMILES team will encourage you to ask questions about any aspect of your procedure, before we begin. We want you to be completely informed and comfortable with your treatment, because your needs and concerns are at the heart of everything we do.

Orthodontics for children

Orthodontics for young children may be as simple as guiding the growth of your child's jaw to maintain space for the adult teeth to emerge in. At 1300SMILES we find that children are very responsive to treatment, because their bones are still developing and are easier to guide into the correct alignment. This pre-treatment can help avoid the need to remove healthy adult teeth in the future due to crowding.

Today, orthodontics is much less frightening for children, using finer brace wires and less bulky brackets for a more comfortable treatment. Our advanced techniques also offer reduced treatment times and improved, long-lasting results.

Orthodontics for teenagers

With the finer, funkier modern orthodontics available today, at 1300SMILES we find that many teens actually prefer to have problems treated, rather than put up with crooked teeth, an unattractive profile or uneven smile.

Following a comprehensive assessment, we will discuss with you and your child the most appropriate treatment and explain the options available for the best long-term result.

Treatment usually lasts around six to twenty-four months, during which time we will carefully monitor your teen's progress and oral health. Regular appointments will be needed to adjust and maintain the braces.

Orthodontics for adults

Today adults too can benefit from orthodontic treatment, to correct tooth alignment problems which may extend back to childhood or have occurred as a result of missing teeth. Orthodontics not only improve the look of your smile, but more importantly, can increase the longevity of your teeth and overall oral health.

A new treatment for adults is Invisalign, clear plastic aligners similar to a sports mouthguard that place a gentle pressure on your teeth, guiding them into position. Being virtually invisible, Invisalign is a popular option for adults, as no-one will notice you're having treatment.

Your treatment usually ranges from nine to twenty-four months, depending on your needs. Although we prefer to avoid the removal of teeth, in cases of severe crowding this may be necessary to create the space needed to re-align your teeth.

Your oral health during orthodontic treatment

We Care™ about your ongoing good oral hygiene when undergoing orthodontic treatment, which is why a meticulous brushing and flossing routine at home is very important. We also advise you to attend regular cleaning appointments at 1300SMILES, so that we can continue to monitor your oral health.
